

DATA ALERTS

Non-questionnaire Survey Variables

Code book documentation of the non-questionnaire survey variables appears immediately after the Caregiver Survey Code book. Non-questionnaire variables come from several sources and may be referenced as appropriate within the questionnaire and code books. The non-questionnaire survey variables document case level information used in sample selection such as the sample person's date of birth and sex. Date of birth and sex are included on the CAPI input file as dependent data used to confirm the identity of the respondent during the interview. These type of variables also document information associated with the results of sample selection such as a sample person's cohort assignment and base weight. In addition, the non-questionnaire variables can include information derived from data collected in the CAPI instrument, but not defined in the questionnaire code books. Finally, non-questionnaire variables include information resulting from post-data collection processing such as the assignment of the screener cross-sectional weight.

Variable Name Highlighted Grey

Variables highlighted grey are not included in the data set, are not bookmarked for easy look-up, and are inset slightly. The variables are included in the code books to correspond to the questionnaire's flow and for reasearcher reference.

Univariate Statistics

If the number of response categories was 20 or less, it was treated categorically. If the number of response categories was more than 20, we present the following univariate statistics: N, mean, standard deviation, minimum, and maximum.

GLOBAL DEFINITIONS

Sample Person: A person age 65 years of age or older who was selected from the CMS list of eligible Medicare beneficiaries.

Proxy: If the sample person is unavailable or unable to answer a person who is knowledgable about the sample person's health conditions and physical activities may be used. The proxy must be at least 15 years old. A list of eligible proxies appears below:

Spouse/spousal equivalent

Spouse/spousal equivalent

Child

Child-in-law

Sibling

Other relative living in household

Other relative not living in household

Legal guardian.

Proxy designated by sample person/family member/legal guardian

If the sample person is deaf or does not speak English and an interpreter is available during the interview, the interview is considered to be a self-interview. However, if the person answers for the sample person without first interpreting the question for him/her, that person is considered a proxy. The interview is a proxy interview. You may also use a proxy for part of the interview if the sample person indicates that someone else can answer certain items more accurately.

Who can be a Proxy?

Ideally, a proxy should be a household member 15 years of age or older who knows about the care obtained or needed by the sample person. (Do not interview a teenager, however, except as a last resort.) The proxy may or may not be related to the sample person. The key requirement is that the proxy know about the sample person's regular care.

When to interview a Proxy.

Proxies should be interviewed when the sample person is unavailable for interview because he/she: Is temporarily absent during the survey period

Is unable to be interviewed due to a physical or mental disability

Does not speak sufficient English.

When the sample person lives by himself/herself and cannot be interviewed because he/she is deaf or cannot speak understandably, you should try to interview a non-household member over the age

of 15 who knows he/she does not speak English.) You may have to make inquiries to find the name, address, or telephone number of a relative if the sample person lives alone.

Negative Number Response Codes

- 4 **Breakoff** - The question was not asked of the respondent because the interview was terminated prior to completion. It reflects the sample person's decision not to continue the interview.
- 5 **Skip**- The sample person is not eligible to be asked this question. The questionnaire is designed to skip the sample person past this question. It is a legitimate skip.
- 6 **Nonresponse** - The question was not asked because the sample person did not participate in the survey. These sample persons are classified as noninterviews and reflect the eligible sample who could not be interviewed.
- 7 **Error** - The question should have been asked of the respondent but his/her answer was not captured. It reflects an interviewer or data collection instrument error.

- (4) Do not continue

DT_DIAL_CHK

DIAL CHECK

Instructions

FR: YOU ARE SUPPOSED TO HAVE SUPERVISORY PERMISSION TO CONDUCT A PHONE INTERVIEW. OCCASSIONALLY THE SAMPLE PERSON INSISTS ON DOING THE INTERVIEW ON THE PHONE. ATTEMPT TO CONVERT THEM TO A FACE-TO-FACE INTERVIEW. SEE THE CONVERSION SCRIPTS BELOW. ATTEMPT CONVERSION TO FACE-TO-FACE INTERVIEW.

CONVERSION 1: It is important that we do this interview in person if at all possible. A personal interview allows the use of visual aids, and makes it easier to explain and clarify questions. Why do you want to do this interview by phone?

CONVERSION TIME: The interview will actually be shorter if you are able to actually see some of the answers rather than having me read them to you.

CONVERSION FEAR:

Could we conduct this interview in a public place like a senior citizen's center or coffee shop? I will come with identification from the Census Bureau so that you will know who I am and a copy of the letter you received so that you will know this is legitimate.

WARNING!**Instructions**

FR: THE DETERMINATION OF QUARTERS SHOULD BE DONE BY YOUR ON-SITE INSPECTION OF THE SAMPLE PERSON'S RESIDENCE. IF YOU CANNOT MAKE AN ON-SITE INSPECTION BEFORE CONTINUING WITH THE INTERVIEW AND HAVE NO KNOWLEDGE OF THE SAMPLE PERSON'S RESIDENCE BASED ON A PRIOR VISIT, THEN ASK THE SAMPLE PERSON.

Definition

Assisted-Living Community - See the definition of in SC_QUARTER1

Data Notes

An assisted-living community could be a Retirement Home, Elderly Community, Independent Living Community, Group Home, etc., with varying degrees of assistance available to the sample person. Some assisted-living communities will group residents into different "levels" of care. If you enter that

the sample person lives in an Assisted Living Community, you will verify this with the respondent. If the respondent agrees that the living quarters are in an Assisted Living Community, you will next ask a series of questions to determine the level of care the sample person is receiving.

874	4.27
2	0.01
7	0.03
16441	80.30
2497	12.20
0	0.00

Rationale

The purpose of this question is to determine if the SP's quarters should be classified as an institution.

Data Notes

In order to mark the item NURSE as "Yes," a health professional is on duty every day, a health care professional must be on duty for 24 hours of every day. This includes weekends as well as weekdays. If not, then, the correct answer would be "No," a health professional is not on duty everyday. Even if a health care professional is on duty when needed or only visits for certain hours on given days, the response is still "No."

Note: Question 0f not used in 2004.

Instructions

FR: READ THE LTC-9(L2) LETTER TO THE SAMPLE PERSON OR, IF PERSONAL VISIT, HAND PERSON A COPY OF THE ADVANCE LETTER. ALLOW ENOUGH TIME FOR HIM/HER TO READ IF HE/SHE SO DESIRES.

We are conducting the 2004 National Long Term Care Survey which is sponsored by Duke University under a grant from the National Institute on Aging. We would like to take about 1 hour of your time to ask some questions about your age, marital status, and everyday activities. Depending on your answers, we may have some additional questions about your health and health care needs. These additional questions will take about 30 or 60 minutes depending on your living situation. The Census Bureau and Duke University will keep your answers confidential and all information will be used for statistical purposes only. This survey is authorized under Title 42, of the United States Code, Section 285e-1 and approved by the Office of Management and Budget. Your participation is voluntary. Although there are no penalties for not answering any questions, your cooperation is extremely important to ensure the completeness and accuracy of the data.

FR: READ THE LTC-9(L3) LETTER TO THE STAFF PERSON OR, IF PERSONAL VISIT, HAND PERSON A COPY OF THE ADVANCE LETTER. ALLOW ENOUGH TIME FOR HIM/HER TO READ IF HE/SHE SO DESIRES.

Duke University, under a grant from the National Institute on Aging, has asked the U.S. Census Bureau to conduct the 2004 National Long-Term Care Survey (NLTC). We selected _____, who lives at your facility, for this survey. Our field representative will contact you soon to arrange for the collection of information about him/her and your facility. Usually, this consists of a short interview with you or members of your staff. The interview will be longer if the individual is not capable of an interview and if he/she does not have relatives we can interview.

Instructions

Before you ask for the sample person's race, you will ask if he or she is of Spanish or Hispanic origin or descent. Always ask for the sample person's ethnicity even if the answer seems obvious. When the respondent is unsure, ask for the origin of the sample person's mother. Record the response. If you are conducting the interview with a proxy, ask the question as worded. If the proxy is a family or household member, do not assume the proxy and the sample person are of the same race or descent.

Data Note

Entry error occurred when the FR backed up and exited the children-not-in-household roster immediately after collecting the children's names, thereby skipping the remaining questions. Although examination of trace files suggests that these errors were prompted by the respondent's refusal to answer questions about their children, they are coded as -7 errors.

- OPEN HOUSEHOLD ROSTER -

Data Note

Roster Suffixes

The '01' or '_1' suffix is reserved for sample person; '02' or '_2' suffix is reserved for spouse. There may be a maximum of 20 persons (sample person, spouse, other household members, children not in household, helpers not previously mentioned, and proxy) in the person roster. These people are referenced by arrays of variables suffixed '01' - '20', each suffix representing one person. For example, since the sample person is always the first entry into the person roster, all person roster variables referring to the sample person are stored into variables ending in suffix '01' or '_1'. Variables not relevant to the rostered person are coded -5. For example, if the third person entered into the roster is a household member, all rostered variables ending in '03' or '_3' will refer to that person. Since s/he is a household member, all of the 'children not in household' variables ending in '03' or '_3' will be coded -5.

Data Note

Roster Questions

The roster questions below are administered in the following manner. First, the names of all household members are collected (10a). Then all the information for the first person is collected (questions 10c through 10k), then we cycle back and collect all the information for the second person added until all information is collected. The same approach is used for children living outside of the household.

SEXFLG03 - 20

Question

10e. Is [ROS_NAME_3-20] male or female?

Instructions

FR: IF GENDER IS APPARENT, MARK WITHOUT ASKING.

Description

SEXFLG03

Description

Male or Female

Note: Question 10f not used in 2004.

APXAGE03 - 20

Question

10g. How old is [ROS_NAME_3-20] as of today?

Instructions

FR: IF LESS THAN 1 YEAR, ENTER 1.

Description

CAPI store into ROS_AGE_3 - ROS_AGE_20

APXAGE03

Description

1 - 130 Years

Data Note

Two types of error generated missing data for these observations. First, if a child was currently in the SP's household but not usually in the household, CHFAM_xx, HOWFAR_xx, and LASTSEE_xx should have been asked. However, CAPI skipped over these questions. CHFAM_xx was set to -7 for these observations. The second type of entry error occurred when the FR backed up and exited the children-not-in-household roster immediately after collecting the children's names, thereby skipping the remaining questions in that roster. Although examination of trace files suggests that these errors were prompted by the respondent's refusal to answer questions about their children, they are coded as -7 errors.

HOWFAR03 - HOWFAR20

	Questionnaire Section	Type	Length	
10m.	CONTROL CARD CHILDREN INFO.	Numeric	2	

Instructions

In this question you will be asking how long it usually takes the sample person's children to get to the sample person's home. Enter the most correct answer. For example, if the respondent states that it would take 60 minutes by plane but 8 hours by car, probe to see which mode of transportation is usually used when making visits to the sample person.

Question

About how long does it USUALLY take for [ROS_NAME_3-20] to get here from (he/she) lives?

Data Note

Two types of error generated missing data for these observations. First, if a child was currently in the SP's household but not usually in the household, CHFAM_xx, HOWFAR_xx, and LASTSEE_xx should have been asked. However, CAPI skipped over these questions. HOWFARxx was set to -7 for these observations. The second type of entry error occurred when the FR backed up and exited the children-not-in-household roster immediately after collecting the children's names, thereby skipping the remaining questions in that roster. Although examination of trace files suggests that these errors were prompted by the respondent's refusal to answer questions about their children, they are coded as -7 errors.

Data Note

Two types of error generated missing data for these observations. First, if a child was currently in the household but not usually in the household, CHFAM_xx, HOWFAR_xx, and LASTSEE_xx should have been asked. However, CAPI skipped over these questions. LASTSEE_xx was set to 1 for these observations, since the child was currently visiting the SP. The second type of entry error occurred when the FR backed up and exited the roster immediately after collecting the children's names, thereby skipping the remaining questions. Examination of trace files suggests that most of these were prompted by respondent refusals.

Definition

See definition in Control Card DOWORK

Data Note

Entry error occurred when the FR backed up and exited the children-not-in-household roster immediately after collecting the children's names, thereby skipping the remaining questions. Although examination of trace files suggests that these errors were prompted by the respondent's refusal to answer questions about their children, they are coded as -7 errors.

Definition

See definition in Control Card DOWORK

Data Note

Entry error occurred when the FR backed up and exited the children-not-in-household roster immediately after collecting the children's names, thereby skipping the remaining questions. Although examination of trace files suggests that these errors were prompted by the respondent's refusal to answer questions about their children, they are coded as -7 errors.

CHECK MORE CHILDREN

Instructions

CAPI: If more children in roster, return to 12d (DT_CHSEX03-20) and complete questions 12d (DT_CHSEX03-20) - 12k (LASTSE03-20) for each child.

- CLOSE CHILDREN NOT IN HOUSEHOLD ROSTER -
