

## DATA ALERTS

### Non-questionnaire Survey Variables

Code book documentation of the non-questionnaire survey variables appears immediately after the Caregiver Survey Code book. Non-questionnaire variables come from several sources and may be referenced as appropriate within the questionnaire and code books. The non-questionnaire survey variables document case level information used in sample selection such as the sample person's date of birth and sex. Date of birth and sex are included on the CAPI input file as dependent data used to confirm the identity of the respondent during the interview. These type of variables also document information associated with the results of sample selection such as a sample person's cohort assignment and base weight. In addition, the non-questionnaire variables can include information derived from data collected in the CAPI instrument, but not defined in the questionnaire code books. Finally, non-questionnaire variables include information resulting from post-data collection processing such as the assignment of the screener cross-sectional weight.

### Variable Name Highlighted Grey

Variables highlighted grey are not included in the data set, are not bookmarked for easy look-up, and are inset slightly. The variables are included in the code books to correspond to the questionnaire's flow and for reasearcher reference.

### Univariate Statistics

If the number of response categories was 20 or less, it was treated categorically. If the number of response categories was more than 20, we present the following univariate statistics: N, mean, standard deviation, minimum, and maximum.

## GLOBAL DEFINITIONS

**Sample Person:** A person age 65 years of age or older who was selected from the CMS list of eligible Medicare beneficiaries.

**Proxy:** If the sample person is unavailable or unable to answer a person who is knowledgable about the sample person's health conditions and physical activities may be used. The proxy must be at least 15 years old. A list of eligible proxies appears below:

Spouse/spousal equivalent

Spouse/spousal equivalent

Child

Child-in-law

Sibling

Other relative living in household

Other relative not living in household

Legal guardian.

Proxy designated by sample person/family member/legal guardian

If the sample person is deaf or does not speak English and an interpreter is available during the interview, the interview is considered to be a self-interview. However, if the person answers for the sample person without first interpreting the question for him/her, that person is considered a proxy. The interview is a proxy interview. You may also use a proxy for part of the interview if the sample person indicates that someone else can answer certain items more accurately.

### Who can be a Proxy?

Ideally, a proxy should be a household member 15 years of age or older who knows about the care obtained or needed by the sample person. (Do not interview a teenager, however, except as a last resort.) The proxy may or may not be related to the sample person. The key requirement is that the proxy know about the sample person's regular care.

### When to interview a Proxy.

Proxies should be interviewed when the sample person is unavailable for interview because he/she: Is temporarily absent during the survey period

Is unable to be interviewed due to a physical or mental disability

Does not speak sufficient English.

When the sample person lives by himself/herself and cannot be interviewed because he/she is deaf or cannot speak understandably, you should try to interview a non-household member over the age

of 15 who knows he/she does not speak English.) You may have to make inquiries to find the name, address, or telephone number of a relative if the sample person lives alone.

**Negative Number Response Codes**

- 4 **Breakoff** - The question was not asked of the respondent because the interview was terminated prior to completion. It reflects the sample person's decision not to continue the interview.
- 5 **Skip**- The sample person is not eligible to be asked this question. The questionnaire is designed to skip the sample person past this question. It is a legitimate skip.
- 6 **Nonresponse** - The question was not asked because the sample person did not participate in the survey. These sample persons are classified as noninterviews and reflect the eligible sample who could not be interviewed.
- 7 **Error** - The question should have been asked of the respondent but his/her answer was not captured. It reflects an interviewer or data collection instrument error.

GROUP	Questionnaire Section	Type	Length
	SCREENER DETAILED INSTRUM INFO	Numeric	2

**Description**

GROUP is set by CAPI at various points in the Screener survey.

**Value Code**

**Value Label**

- 1 Receives detailed instrument because part of H-designated subgroup
- 2 Receives detailed instrument because disabled on ADL or IDL for 3+ months
- 3 Receives detailed instrument because in N-designated longitudinal subgroup
- 4 Receives detailed instrument because Institutionalized
- 5 Skip
- 6 Nonresponse
- 7 Error

Frequency	Percent
818	4.00
2172	10.61
2575	12.58
1124	5.49
11755	57.41
2030	9.92
0	0

**Rationale**

It should be noted that GROUP is used only to determine why the SP was scheduled for a detailed interview. The GROUP box is provided at this point in the questionnaire to provide the FRs with information, and does not influence survey flow.

**Data Notes**

The GROUP variable is set in Screener interviews conducted both by personal visit and telephone. During a personal visit, GROUP is first evaluated at RETIRE2\_5 and Q\_NURSE. If the SP is institutionalized GROUP is set to 4. During a personal visit interview where the SP is in the community or during a telephone call, GROUP is determined at S\_RNHELP (telephone only) and SAMP\_N\_04, SCN\_GRPD, and SCN\_CKF (personal visit and telephone).

To find whether the SP is in the community or institutionalized, use LTC\_FLAG. To determine which survey was administered to the SP, use SURVEY04.

**Instructions**

**FR: DO NOT READ ALOUD.**

**Definitions**

1. **Housing Unit** - The living quarters (rooms, group of rooms, house, etc.) occupied by persons who live or eat together is a housing unit if it meets two requirements: separateness and direct access.

**Separateness:** The occupants live and eat separately from all other households on the property.

**Direct Access:** Either an entrance to the unit directly from the outside of the structure, or an entrance to the unit from a hall, lobby or vestibule which is within the structure and used by the occupants of more than one unit. This means that the hall, lobby or vestibule is not part of any unit; it must be clearly separate from all units in the structure. It may be furnished or unfurnished. Any room that serves the same purpose as a hotel lobby may be considered a common hall provided it is not part of any unit. A unit does not have direct access if the only entrance to the unit is through a room or a hall of another unit.

2. **Staff Quarters in an Institution** - A residential unit in an institution that is provided to staff or employees of the institution. The institution can be a nursing home, assisted living facility, mental or long stay hospital, or a correctional facility. Anytime this living quarter is checked, you will need to provide a description of the living quarter. The description should include the type of institution where the sample person is living.

3. **Assisted Living Community.** This could be a Retirement Home, Elderly Community, Independent Living Community, Group Home, etc., with varying degrees of assistance available to the sample person. Some assisted-living communities will group residents into different "levels" of care. Housing in assisted-living communities includes cottages, apartments and something resembling nursing home rooms. If you enter that the sample person lives in an Assisted Living Community, you will verify this with the respondent. If the respondent agrees that the living quarters are in an Assisted Living Community, you will next ask a series of questions to determine the level of care the sample person is receiving.

4. **Active Adult Community/Senior Apartment Complex** - These places are age-restricted housing (often 55 and older) which may offer some services, such as meals or social activities, but usually do not provide assistance with activities of daily living, such as help with dressing and bathing.

5. **Quarters, Not a Housing Unit, in a Rooming or Boarding House, Convent, Commune, Foster or Family Care Home, Group Home, Community Residential Facility, Etc.**

**Boarding House** - An establishment which has five or more units for rent to boarders and which serves regular meals to the residents who pay a combined rate for their room and meals on a weekly or monthly basis. The proprietor may or may not eat with the boarders.

**Convents, Monasteries, and Other Residences for Religious Orders** - A place is a convent or monastery if it is officially called a convent or monastery, regardless of the number of persons in the place. "Official" means that there is a sign or a name on the mailbox, such as "St. Joseph's Convent," or the group consider the place to be a convent or monastery.

**Commune** - These are residences, such as foster homes and board-and-care homes, that provide a home environment in the community for the elderly, handicapped, and functionally disabled as an alternative to institutional care. The occupants must own or rent their living quarters. Some supportive services are offered, such as supervision of diet and self-administered medication, assistance with housekeeping, and arrangement of transportation and recreational activities. Services do not include continual nursing care, medical care or psychiatric care by staff members. Meals may or may not be provided.

**Group Home** - A group of five or more unrelated persons living together who pool their resources but have no regular arrangements for contributing to expenses.

6. **Resident's Unit in Nursing, Convalescent or Rest Home**, or Home for the Aged (Non-staff), Commercial home for the aged, County home, almshouse, poor farm, etc., Fraternal or religious home for the age, Home or school for the blind or deaf, Veterans' Administration home (domiciliary care).

7. **Nursing Wing or Unit of a Continuing Care Retirement Community (CCRC)** - These places offer skilled nursing care on the same level as a nursing home. If you have sufficient information from the address or some other source that the sample person resides in the nursing wing of the CCRC, mark this box.

8. **Patient's Unit in Mental or Other Long-stay Hospital**, Chronic or cancer hospital, Home for incurables, or hospice, Home for mental convalescents, Home or training school for mentally handicapped, Home or training school for mentally handicapped, Home, training school, colony, or village for epileptics, Hospital for the treatment of alcoholics or drug addicts, Private, State, Federal, County, City, or Veterans' Administration Hospital or sanatorium for mentally ill, Tuberculosis sanatorium.

9. **Non-staff Unit in Other Institution** - A non-staff residential unit within an institution. This classification should only be used when the sample person's living quarters cannot be classified in any of the existing categories. Anytime this living quarter category is checked, you will need to provide a description of the living quarters. The description should include the type of institution where the sample person is living.

10. **Inmate's Unit in Correctional/Detention Facility**, County or City jail, workhouse, or penitentiary, State, Federal, County, or City prison farm or camp, State, Federal, County or Municipal training or industrial school, Federal Detention headquarters, Private school for delinquents such as "House of Good Shepherd," "Boys Town," etc., State or Federal penitentiary, prison, or reformatory.

**Instructions**

**ALL SKIP TO LTC\_FLAG\_SPV**

**Rationale**

The purpose of this question is to determine whether the sample person's quarters should be classified as an institution.

**Data Notes**

In order to mark the item NURSE as "Yes," a health professional is on duty every day, a health care professional must be on duty for 24 hours of every day. This includes weekends as well as weekdays. If not, then, the correct answer would be "No," a professional is not on duty everyday. Even if a health care professional is on duty when needed or only visits for certain hours on given days, the response is still "No."

**Note: Question 0f not used in 2004.**

**ADVLTR**

**Instructions**

**FR: IF FIRST OCCURRENCE:**

**Question**

4a. Recently, we mailed a letter explaining our survey. Did (you)/[SAMPNAME] receive the letter signed by the Director of the Census Bureau?

**Instructions**

**FR: READ THE LTC-9(L2) LETTER OR, IF PERSONAL VISIT, HAND PERSON A COPY OF THE ADVANCE LETTER. ALLOW ENOUGH TIME FOR HIM/HER TO READ IT IF HE/SHE SO DESIRES.**

The U.S. Bureau of the Census is conducting the 2004 Long-Term Care Survey in conjunction with the Centers for Medicare and Medicaid Services, which oversees the Medicare Program and Duke University, which is operating under a grant from the National Institute on Aging. This survey collects information from a small number of Medicare beneficiaries to help us better understand the long-term health care needs of our growing elderly population. We would like to take about 10 minutes of your time to ask some questions about your age, marital status, and everyday activities. Depending on your answers, we may have some additional questions about your health and health care needs. These additional questions will take about 30 or 60 minutes depending on your living situation. The Census Bureau and Duke University will keep your answers confidential and all information will be used for statistical purposes only. This survey is authorized under Title 42, of the United States Code, Section 285e-1 and approved by the Office of Management and Budget. Your participation is voluntary. Although there are no penalties for not answering any questions, your cooperation is extremely important to ensure the completeness and accuracy of the data.

**Instructions**

**FR: IF CONTINUATION OF INTERVIEW AFTER FIRST OCCURRENCE:**

**Question**

Recently we contacted you to answer some questions regarding long-term care in the United States. Some of the questions have already been answered. Let me see where we should begin.

5	0.02
34	0.17
2639	12.89
2030	9.92
3	0.01

**Instructions**

Before you ask for the sample person's race, you will ask if he or she is of Spanish or Hispanic origin or descent. Always ask for the sample person's ethnicity even if the answer seems obvious. When the respondent is unsure, ask for the origin of the sample person's mother. Record the response. If you are conducting the interview with a proxy, ask the question as worded. If the proxy is a family or household member, do not assume the proxy and the sample person are of the same race or descent.

**Definition**

The national origin or cultural group a person is descended from is determined by the nationality or lineage of a person's ancestors. There is no rule on how many generations to consider. A respondent may report origin based on the origin of a parent, grandparent, or far-removed ancestor. Listed below are possible responses and countries considered to be Spanish or Hispanic:

Argentina	Balearic Islands	La Roza	Majorcan
Basque	Bolivia	Mexican-American	Mexican
Californie	Californio (Californi)	Nicaragua	Panama

Canary Islands	Catalonian	Puerto Rican	Spanish
Chicano	Costa Rica	Spanish-American	Spanish speaking
Cuban	Dominican Republic	Spaniard	Uruguay
Ecuador	El Salvador	Venezuela	
Guatemala	Hispanic		
Honduras	Iberian (i.e. Spain)

**SCN\_25B\_P****Description**

No More

**Instructions**

**FR: DO NOT PROBE - UNLESS RESPONSE IS HISPANIC OR IS A HISPANIC ORIGIN.  
 ENTER THE CATEGORY NUMBER TO SELECT OR DESELECT.  
 ENTER (N) WHEN DONE.**

**Data Notes**

When asking for the sample person's race, do not try to explain or define any of the groups. Read the respondent the race categories. If more than one race is reported, enter all of the race categories reported by the respondent.

If the response is not listed in the codes you read to the respondent, (for example, ethnic origin such as Spanish, French, Italian, instead of a race), ask "Which of the races I read previously is that?"

For responses of Caucasian, select 1 for White. For responses of Negro, select 2 for Black.

**Definition**

**Race:** The concept of race does not reflect clear cut definitions of biological stock or conform to any scientific definition. Rather, it reflects self-identification by the respondent. It reflects the race(s) with which the sample person most clearly identifies.

**Instructions**

**FR: SHOW FLASHCARD 3.**

**Definition**

**Education exclusions:**

Do not include education obtained at vocational schools, business schools or colleges, and other trade and specialized schools unless such schools are part of a regular school system.

Do not include training received by mail from "correspondence" schools, unless the correspondent course counted toward promotion in a regular school.

Do not include any "on-the-job" training.

Do not include adult education classes unless such schooling is being counted for credit in a regular school system. If a person is taking adult education classes but not for credit, he/she should not be regarded as enrolled in a regular school. Most of the training such as is under the Manpower Development and Training Act of 1962, Comprehensive Employment and Training Act of 1973 (CETA), or Poverty Program more than likely will be courses obtained at private vocational or trade schools or possibly will be in the nature of on-the-job training. In any event, most training under these Acts or the Poverty Program will not be obtained at a regular school. There may, however, be a few isolated cases where such schooling is given for credit at a regular school. Ask to be sure.

51	0.25
112	0.55
2639	12.89
2030	9.92
3	0.01

**Definition**

Service in the Armed Forces includes active duty in the U.S. Army, Navy, Air Force, Marine Corps, Coast Guard, and any National Guard unit which was activated as a part of the regular Armed Forces.

The following categories of service are also included:

1. Service in the reserves if on active duty status for several months.
2. Commissioned officers of the U.S. Public Health Service who were attached to a branch of the Armed Services.
3. The 6-month period a sample person may have served in connection with the provisions of the Reserve Forces Act of 1955.
4. Cadets in the United States military academies, such as West Point.

**The following are not included as Service in the Armed Forces:**

1. Sample persons whose only service was in the Coast Guard Temporary Reserve.
2. Employees of the Merchant Marine, Maritime Commission, American Field Service, or civilian employees of the Department of Defense.
3. Service in a National Guard Unit which was not activated into the regular forces.
4. Sample persons who had short periods of active reserve training or who attended weekly reserve meetings.

There are two components of each of the military services, a regular component and a reserve component. Always consider members of the regular Armed Forces to be on active duty unless retired. Members of reserve components may be called to active duty by military order. Include as active duty the 4-6 month period young men serve in connection with provisions of the Reserve Forces Act of 1955.
