<u>SAS Name</u>	<u>Variable Description</u>	<u>Data Type</u>	<u>ASCII Start</u>	<u>Length (Format)</u>	<u>Values</u>	<u>Values Description</u>
URBAN_RURAL99	1999 Urban/Rural Designation If the 1999 Screener zip code fell within a MSA or PMSA as of September 2000, a designation of 'Urban' was made. Otherwise, a designation of 'Rural' was made. CD Light, Limited Liability Corp. was the source for the MSA/PMSA data.	Integer	575	1	0: Unknown 1: Urban 2: Rural 9: Not In Survey Year	
SURVEY82	1982 Survey Designation	Integer	576	2	1 = 'Screener Only (Screened Out)'	
SURVEY84	1984 Survey Designation	Integer	578	2	2 = 'Community Survey'	
SURVEY89	1989 Survey Designation	Integer	580	2	3 = 'Community with Caregiver' 4 = 'Institutional' 5 = 'Screener Non-Interview' 6 = 'Detailed Non-Interview' 7 = 'Next-of-Kin interview' 9 = 'Not in Survey Year'	
<p>1) Since a deceased questionnaire was administered in 1984, the number of 'Nonresponse-Deceased' is zero for 1984.</p> <p>2) Includes both Type A (within sample universe) and Type C (out of sample universe) nonresponse.</p> <p>3) Includes people nondisabled on ADL measure and people who require assistance or equipment to perform the ADL.</p> <p>4) Missing values for race were imputed for 208 observations.</p> <p>5) The 'Heavy Housework' IADL is not used to determine disability on the Screener questionnaire. It is only assessed on the Community questionnaire. This condition required CDS to implement a consistency check in calculating its disability group variables. If 'Heavy Housework' was the individual's only disability measure, ADL or IADL, and they were a member of the survey subgroup that automatically received a detailed questionnaire, they were considered "non-disabled." Had they received a screener, they would not have been asked about heavy housework and would, as far as anyone can know, been considered non-disabled, and not have been selected. However, if the individual was part of the group that received a screener questionnaire, and was selected for a detailed interview because they scored as disabled at the time of the screen, they were considered "IADL only".</p> <p>6) Gender was corrected from previous Analytic File for 16 observations.</p>
